Government Grants and Contracts

Governments at all levels depend on charitable nonprofits to provide efficient and effective services to residents that would be more costly if provided by others. Likewise, the nonprofit sector, as a whole, earns about a third of its total revenue by providing services under written agreements with governments.

The National Council of Nonprofits and its network of state associations of nonprofits are committed to improving the government-nonprofit contracting relationships and fix broken and antiquated grant/contracting systems in order to promote efficient and effective programs and services. The Office of Management and Budget's Uniform Guidance presents significant opportunities for nonprofits and governments to strengthen nonprofits and the services they provide.

Key Issues
